

Gill

2019 BUYERS GUIDE

Brand Story.

"When I first started sailing, we had no sailing gear, we used to go sailing in t-shirts, shorts and canvas shoes and we never went out on the water in Winter, we just couldn't. I was passionate about sailing so I decided to write a business plan for a sailing product company, I first put that plan into action in 1975 in the corner of my Fathers textile factory in Long Eaton, Nottingham.

Back then we had a space just 10 meters squared but it worked – we were flexible and creative and always had the end user in mind as we developed new sailing product. That business ethos is what has led to the successful business and brand we have today and why so many sailors and outdoor enthusiasts trust and rely on our products."

- Nick Gill.

Trusted on the water for more than 40 years Gill did not start as a brand or a business, it started as a solution to find better more capable sailing clothing using the best fabrics possible. Combined with innovative design to increase performance and tested on elite athletes in the most challenging of conditions it means you can rely on Gill on or off the water - only you limit how you use our products.

OUR MISSION

We are Inspired by water.

Technical apparel designed and engineered for the perfect balance of performance & protection on or around water. No compromise.

OUR VALUES

We...

EXPLORE

CHALLENGE

INSPIRE

TRUST

EXCEED

OUR MANIFESTO

We are Gill.

We create the best technical apparel for on or around water. From rough seas & calm lakes, to coastal walking in the rain you can trust us to always design & engineer products that ensure you can do more of what you love.

We are never less than brave in our designs, our ambitions & our approach to creating the best.

Gill Fabrics.

Our clothing was created for the water. Our clothing performs on the water.

DIFFERENT FABRICS

Today all fabrics are breathable so the choice comes down to the handle and feel, which is affected by the weight, density of the weave, and whether the proofing is a coating or laminate.

COATINGS

Coatings are a more traditional approach to proofing a garment. A Polyurethane based resin is spread onto a woven fabric. It first has to fill in the weave undulations to seal it and then build up a layer that covers it all evenly. Finally, the fabric is dipped into a DWR solution for water repellence on the exterior.

LAMINATES

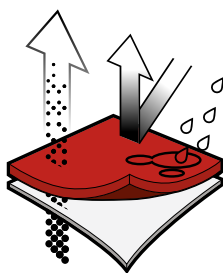

Laminates are a more recent development. A laminated waterproof fabric is created by bonding a thin membrane to a woven outer layer. This means the thickness of this laminate film can be finely controlled. The end result is a fabric that is lighter and waterproof. It is more flexible, softer and much more comfortable to wear.

In 2002 we decided to move away from high profile branded fabrics to give us greater flexibility in order to continue to produce the best product there is. Whether you are walking in rain or battling with the elements out on the water, all of our fabrics offer you the latest technology so you get the best protection, comfort and fit possible.

Fabrics Explained.

TWO, THREE OR FOUR LAYER FABRIC?

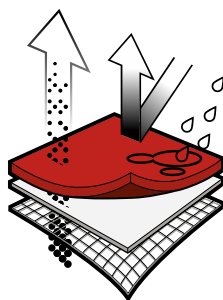

Conventional waterproof fabrics fall into three main categories:

TWO LAYER

Generally lighter than most fabrics this features on our Inshore/Coastal Sailing & Dinghy wear.

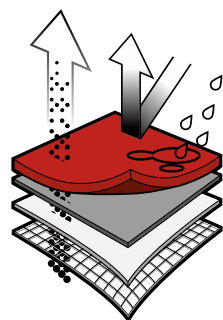

- 1) Woven textile with laminated or coated finish on the inside.
- 2) Protective lining for the coated surface, making it more comfortable to wear.

THREE LAYER

This fabric features on our Race Fusion Jacket, Smock & Salopette.

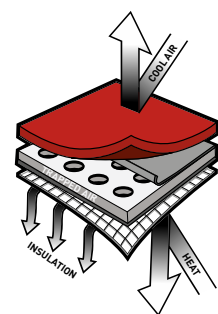

- 1) Woven textile with laminated or coated finish on the inside.
- 2) Protective lining for the coated surface, making it more comfortable to wear.
- 3) Lightweight mesh is then bonded on the inside of the fabric.

FOUR LAYER

For the toughest conditions this fabric features on our Race Ocean, OS1 Ocean, 4802 Pro Drysuit.

- 1) Robust protective material, abrasion resistant, water repellent.
- 2) Hydrophilic coating to channel moisture away from the body.
- 3) Hydrophobic laminate, flexible waterproof barrier to repel water, but still allows water vapour to escape.
- 4) Ultra-lightweight wicking scrim to protect the waterproof layers from damage.

FIRECELL NEOPRENE

Our FireCell fabric keeps you dry, warm and comfortable during extreme conditions on the water, this fabric features on our RS16 Race Firecell Skiff Suit, RS17 Race Firecell Top.

- 1) Protective nylon outer that defends against wear and tear.
- 2) FireCell thermal pockets trap air to create an extra level of warmth.
- 3) Plush Thermogrid liner insulates and retains body heat.

Race.

Designed to meet the needs of the elite level sailor, the innovative Race range has been designed with advanced technological details to provide the ultimate protection for professional racers.

RS21_RACE OCEAN JACKET

Technology:

- High performance, durably waterproof and breathable 4-layer fabric.
- Fabric weight reduced by 10% for a softer and more flexible handle.
- 15% increase in resistance to surface abrasion.
- Next generation SuperFabric® protection zones protect against wear and tear from the toughest of surfaces.
- Fully taped seams for a waterproof seal.

Features/Benefits:

- New low bulk hood features a 2-way adjustment system with internal fleece lined cord channel for a secure, comfortable fit.
- Ocean height collar with high, wrap-around face guard.
- Gridded thermal inner collar and chin guard.
- Hand warmer pockets protected by YKK Aquaguard® water resistant zips and internal security pocket.
- Upgraded anti-corrosion YKK zippers with lightweight moulded sliders.
- Photoluminescent prismatic reflectives using Solas grade material in an exclusive Gill design.
- Reflective Gill logos and 3M accents provide 360° visibility.
- 2-way zipper protected by a double front storm guard.
- Adjustable cuffs with PU inner seals for watertight comfort.
- Cargo pockets for storing bulky objects.
- Hi-vis shock cord hem and waist adjustment that can be accessed without opening the jacket.
- Alu D-ring attachment point for marine tools or kill-cord leash.

Fabric Composition:

- Outer: 100% Nylon
- Fleece: 100% Polyester
- Reinforcement: 100% Polyester

Relaxed fit

Performance.

An aerial photograph of a coastline where dark, jagged rocks are partially submerged. White, frothy waves are crashing over the rocks, creating a complex, web-like pattern of white foam against the dark water. The perspective is from directly above, looking down at the sea.

Designed for all seasons and conditions,
the adaptable Performance range is engineered
to keep you comfortable and protected whether
on or offshore.

OS12S_OS1 OCEAN SMOCK

Technology:

EYEWEAR

Race Technology

Superior injection moulded lens technology. 10 times greater impact protection, improved clarity, salt water and scratch resistant.

Glare-free vision

Polarized lenses block the glare produced by light reflecting off the water or bright deck surfaces which can create a distracting haze; a real issue when you're looking for marker buoys or checking sail trim. Optically-corrected, shatter-resistant cushion elements are laminated to both sides of the UV absorbers, followed by a unique scratch resistant coating applied to the outer surfaces.

Natural colours

Filter category 3 lenses allowing 8-18% light transmission and are useful in bright sunlight, driving and general purpose wear.

100% UV400

UV light absorbers, which block 100% of harmful UVA, UVB, and UVC radiation.

Reduced eye fatigue

A quality optical lens is used to prevent vision distortion as cheaper lenses bend and misdirect light so that sizes, shapes and even distances can become distorted – leading to eye strain as you're forced to compensate. They comply with European Class 1 Optics Standards.

Floatable

Designed for life on the water, all Race and Performance sunglasses float.

Hydrophobic

Hydrophobic outer coating sheds water and reduces salt residue for clear vision.

Oleophobic

Oleophobic technology applied to the inside face repels fingerprints, sun lotion and skin oils. This is the same technology found on touch-screen devices to reduce finger marks.

All of our garments are sized and fitted with end use in mind, we have defined our different types of fit here. Products not labelled as one of our other specific fits will be a regular fit.

Next to Skin
Follows the contours of the body giving freedom of movement.

Slim Fit
Closer fit, giving a silhouette that skims over the body.

Regular Fit
Neither close fitting or oversized, designed to be versatile and fit as expected for the products' intended end-use.

Relaxed Fit
Cut looser with more room around the body. Ideal for layering over other pieces.
